

A mobile frame supporting a horizontal wire; this manual device is the ideal tool for slicing a block or stacked panels to the required length.

ADVANTAGES

- Large cutting capacity: Block 1400 mm x 1400 mm, unlimited length
- System delivered assembled, ready for use
- mobile machine, light, compact and easy to use
- Precise, quick and effortless slicing
- Cutting without no noise or dust.
- CE Standards
- **1 year warranty**

Technical Data

Technology	Horizontal wire by gravity cut	
Precision	± 1.0 mm	
Cutting wire	Special Alloy Nickel / Chrome	
Section wire	Delivered with 5 wires Ø 0.5 mm	
Mobile	Equipped with rotating wheels, 2 are provided with brakes	
Structure	Anodized aluminum 45x90 mm	
Heat	Constant, immediate and non-adjustable by on / off switch	
Connection	A 5 meter cable length connecting to the AC outlet.	
Voltage	230 VAC 2.5A	115 VAC 2.5A

Process

The downward movement of the movable part can be carried out either by gravity or with the operator driving the movement with the side handle.

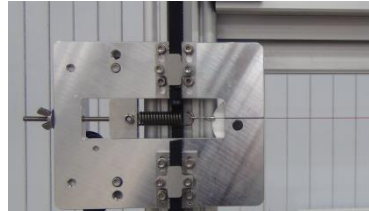

The return into the top position of the wire is done manually by the operator.

Handle to drive cutting wire

Reinforced wheels

Tension system of the wire
