

Hot wire cutting table - XY

This hot wire cutting table can make straight cuts in most of hotmelt materials, such as expanded polystyrene or thin plastics. Thanks to the two axis movement capacity of the cutting wire, almost all kinds of cutting can be done with the help of a jig when necessary.

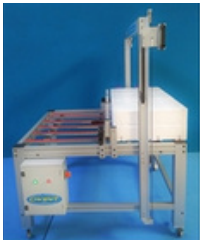

ADVANTAGES

- › Fast and easy installation
- › Easy and clean cuts: noiseless and dust-free
- › Fast and effortless slicing, by gravity
- › High precision and repeatability, thanks to the rulers and to the movable stop system
- › Robust and ergonomic workstation
- › 1 year warranty
- › CE standard

M MODEL

TECHNICAL DATA

CUSTOM MODEL

RULERS AND
ADJUSTABLE STOP

TECHNOLOGY

- Hot wire

ACCURACY

- ± 1 mm

CUTTING WIRE

- Nickel / Chrome base, delivered with 5 spare wires

WIRE DIAMETER

- Ø 0.5 mm

CUTTING TABLE

- Reinforced wood, 13-ply

STRUCTURE

- Stainless anodized aluminum

TABLE HEIGHT

- 800 mm

TEMPERATURE

- Immediate, constant and non-adjustable

VOLTAGE

- 230 VAC or 115 VAC

OPTIONS

WHEELS AND BRAKES

- Turns the machine into a mobile system, easily movable around your premises.

MOTORIZATION

- The cutting wire can go up and down automatically.

CUSTOMIZATION

- Customization upon request, adaptation to your application and to your needs.

MODELS

Cutting capacities	Standard
Table length (mm)	3000
Working length of the wire (mm)	1300
Vertical movement of the wire (mm)	1300

The dimensions can be customized upon request, do not hesitate to **contact us** for more information.
